

SD Mannitol

Product description:

The mannitol SD series produced by spray drying, as pharmaceutical excipients, is especially suitable for direct compress tablet process and direct blending process. Good compatibility, tightness, and high intrinsic dissolution rate compared with other bonded fillers.

1. Good for Direct Compress.
2. Flowability.
3. Compactability.
4. Good drug-binding properties and rapid disintegration capacity.
5. Ensure tablet uniformity, stability, and optimal sensory properties.

Application:

Spray-dried Mannitol.

1. Pharmaceutical excipients (Direct pressing process): Oral Tablets, Chewable Tablets, Oral Dispersion Tablets.
2. Lozenge.
3. Preparations like Granules.

Standard:

CP/USP/EP/BP/JP/IP/E421/FCC/GB1886

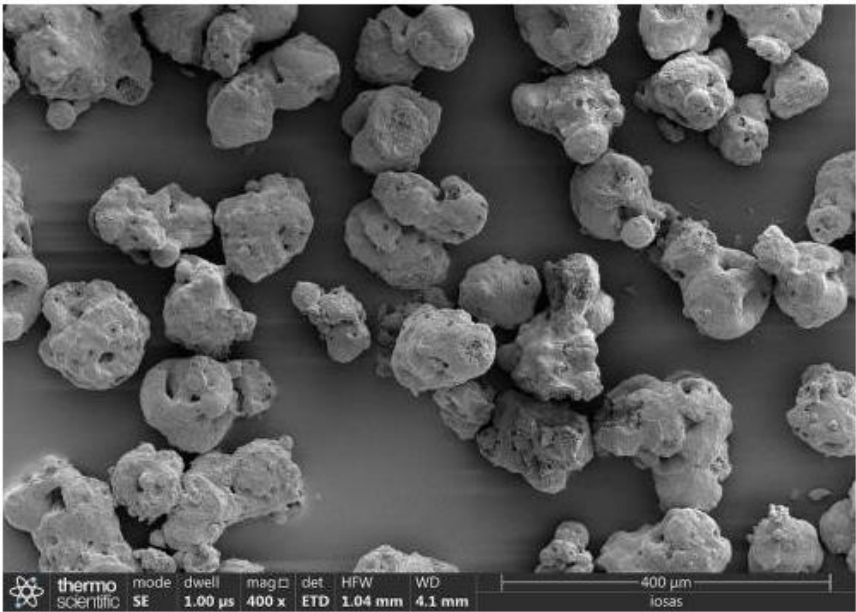

Particle Size Distribution (by Electron micrographs):

d10=60 μm

d50=150 μm

d90=245 μm

Electron micrographs:

Certificate:

ISO9001、ISO14001、ISO22000、HACCP、KOSHER、HALAL、GMP、FDA、CDE
